MEDIA RELEASE

SACYR WILL DEVELOP AN INTEGRATED MANAGEMENT SYSTEM FOR HOSPITAL INFRASTRUCTURE

- The Community of Madrid's Innovation Hubs call, has approved the Cognitive Hospital project, developed by a Sacyr-led consortium with eight other companies.
- Sacyr, a benchmark in hospital infrastructure development, will implement this state-of-the-art technology with this project to position Madrid at the forefront of hospital management.

Madrid, February 7, 2024.- The objective of the Cognitive Hospital project is to **develop a smart platform** based on innovative technologies such as AI, advanced algorithms, BIM, Big Data, etc. Development and implementation of this project will optimize **design, build and operation and maintenance** processes, **improve energy efficiency** and **air quality** in our hospital assets, as well as **reduce the environmental footprint** linked to our infrastructures in both the construction and operation stages.

Sacyr Concesiones leads this project along with eight other companies and the participation of Sacyr Engineering and Infrastructures and corporate services.

Organizations involved are **Sener Mobility, Fractal, 4Digital, Open Ingenius, Áptica, Tecnalia's tech centers, UPM and CSIC.**

This is an ambitious project with a **€6.1 million budget** and €2.9 million in aid funds from the Community of Madrid. This funding is part of the 2023 call to promote public-private cooperation in R&D&I with PPP projects with a traction effect. They are co-financed by the European Regional Development Fund within the ERDF operational program of the Community of Madrid for the 2021-2027 period.

MEDIA RELEASE

Implementation at the Hospital del Henares

Its implementation will take place at the Hospital del Henares, managed by Sacyr Concesiones, with a **three-year execution deadline** (2024-2027).

Antonio Ramírez, Innovation Manager at Sacyr Concesiones said: "Through the application of innovative technologies, we can achieve **more efficient hospital management**."

All of this will bring significant **benefits** to all stakeholders involved in the management and operation of the hospital, as well as for patients and clients.

Ana Esteban, Innovation Manager at Sacyr Ingeniería e Infraestructuras, highlights that the Cognitive Hospital will "introduce **innovation** in the center's operation and maintenance environments and **improve the patient's experience**."

This project represents a new milestone in **public-private partnerships**, a cornerstone of **Sacyr's business model**, maximizing the value offered to our client beyond contractual requirements and bringing together the best internal and external talent.
