

PRESS RELEASE

SACYR MAKES CDP'S 'DOUBLE A' LIST FOR TRANSPARENCY IN CLIMATE CHANGE AND WATER SECURITY LEADERSHIP

- **Sacyr is among the top 4% of best scored companies by CDP, the world's leading independent environmental disclosure platform.**

Madrid, December 19, 2025.- Sacyr has made it into CDP's prestigious '**Double A List**', recognizing the company's leadership in both climate change and water security. CDP is a non-profit organization running the world's largest environmental disclosure system.

Inclusion on the 'Double A List' demonstrates Sacyr's **commitment to addressing today's most pressing environmental challenges.**

Sacyr achieved an "A" score for climate for the fourth consecutive year, driven by its comprehensive decarbonization strategy and proactive climate risk management. In **water security**, the company has maintained its **leadership position for the third year, earning an "A" grade** that highlights its dedication to **protecting vital water resources.**

CDP assesses and scores over 24,800 companies, maintaining the world's largest environmental database, aligned with the Task Force on Climate-related Financial Disclosures (TCFD). CDP data is a catalyst for change, enabling harmonization of climate and nature with economic imperatives. Disclosed information is a critical resource used by **policymakers, governments, investors, purchasers, and financial institutions.**

CDP's scoring is based on voluntary and comprehensive disclosure of environmental data, providing a robust assessment of how companies manage climate change and water-related risks and opportunities. **Inclusion on CDP's 'A List' recognizes those companies leading the transition to a more sustainable and resilient economy.**

Patricia Martínez Íñigo, Sacyr's Chief Sustainability, Environment and Innovation Officer, stated: "Our fourth consecutive year in the leadership band of CDP's rigorous environmental

PRESS RELEASE

disclosure process confirms the strength and consistency of our strategy. By reducing emissions and managing water resources responsibly, we are creating long-term value for our customers, investors, and the communities we serve."

Advancing Decarbonization

This year, Sacyr **reinforced its climate leadership by revalidating its science-based targets**. The Science Based Targets initiative (SBTi) has rigorously reviewed Sacyr's targets and affirmed that they are aligned with a 1.5°C pathway, the most ambitious designation available.

Specifically, Sacyr has committed to **reducing absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 42% by 2030**, from a 2020 base year, and to **reducing absolute Scope 3 GHG emissions** – covering purchased goods and services, fuel- and energy-related activities, and waste generated in operations – **by 25% within the same timeframe**.

Sacyr's **Decarbonization Plan** comprises more than **300 projects** implemented across its business lines and locations.

Water Positive

Sacyr was the **first Ibex 35 company to have its water footprint verified** according to the ISO 14046 standard. In 2025, **AENOR has certified this verification for the fourth consecutive year**, demonstrating Sacyr's leading role in water resource protection within the infrastructure sector.

Sacyr aims to **reduce its own water consumption by at least 5% by 2027** across all its activities, in both high and low water stress areas. To achieve this, the company assesses its water footprint to understand, identify, and evaluate the actual and potential impacts related to freshwater and marine environments.

Sacyr's **wastewater treatment activities significantly improve water quality**.
