

PRESS RELEASE

SACYR PUBLISHES ITS 2024-2025 NATURAL CAPITAL REPORT

- **This biennial publication underscores Sacyr's dedication to protecting biodiversity**

Madrid, May 7, 2026.- Sacyr has released its **second Natural Capital Report**, a biennial document that **highlights the company's dedication to biodiversity protection and the integration of nature-related criteria** into its business model.

This edition outlines the **progress achieved in 2024 and 2025** in identifying, managing, and mitigating impacts on ecosystems, as well as assessing risks and opportunities associated with natural capital.

The Report outlines Sacyr's comprehensive approach to **integrating nature into business decision-making, spanning from corporate governance to project execution.**

Over the 2024-2025 period, **the company has advanced in measuring its ecosystem impacts and has launched a wide array of initiatives dedicated to protecting fauna, flora, ecosystems,** and historical and cultural heritage in the countries where it operates.

Rigorous International Standards

For this edition, Sacyr ensured the document adheres to the **most rigorous international standards for nature-related disclosure.** This includes **GRI 101 Biodiversity, ESRS E4 on Biodiversity and Ecosystems** from the Corporate

PRESS RELEASE

Sustainability Reporting Directive (CSRD), and the recommendations of **the Taskforce on Nature-related Financial Disclosures (TNFD)**.

This alignment not only elevates the report's technical quality but also firmly establishes Sacyr among global leaders in non-financial reporting best practices.

The Report also underscores robust governance, showcasing the critical role of the **Biodiversity Committee**, established in 2022. This committee serves as a vital coordination hub between senior management and project environmental teams.

It also outlines **Sacyr's core corporate policies** guiding its actions in this area, including the Biodiversity Policy, the Water Policy, and the comprehensive integration of environmental criteria throughout its supply chain.

Impactful On-the-Ground Actions

The document further **elaborates on numerous on-the-ground initiatives**, tailored to local contexts and aligned with the mitigation hierarchy (avoid, minimize, restore, and offset). These include ecological restorations and reforestation with native species, wildlife protection, control of invasive alien species, and the recovery of wetlands and riverbanks.

These actions are complemented by **responsible water management, focusing on efficiency and the use of recycled water in water-stressed areas**. Additionally, measures for the protection of archaeological, historical, and cultural heritage are in place, safeguarding the memory of the territories where projects are developed.

The publication of this second Natural Capital Report **reaffirms Sacyr's commitment to a business model that integrates environmental sustainability as a strategic pillar**. This commitment drives the company towards a more resilient infrastructure
